
Above 1: the evening/morning ratio is larger on longer days; below 1: it is smaller. Circadian phase is relative to MSFsc.
Shorter: Morning: 4 participants / 23 participant−days; Evening: 9 participants / 48 participant−days.
Longer: Morning: 9 participants / 39 participant−days; Evening: 7 participants / 40 participant−days.
95% pointwise exploratory band, unadjusted across phase. Bold segments: supported 95% intervals exclude 1. Crosses mark unsupported phase bins.
Grey windows with dashed boundaries: primary phase intervals. Striped band: DLMO reference.
