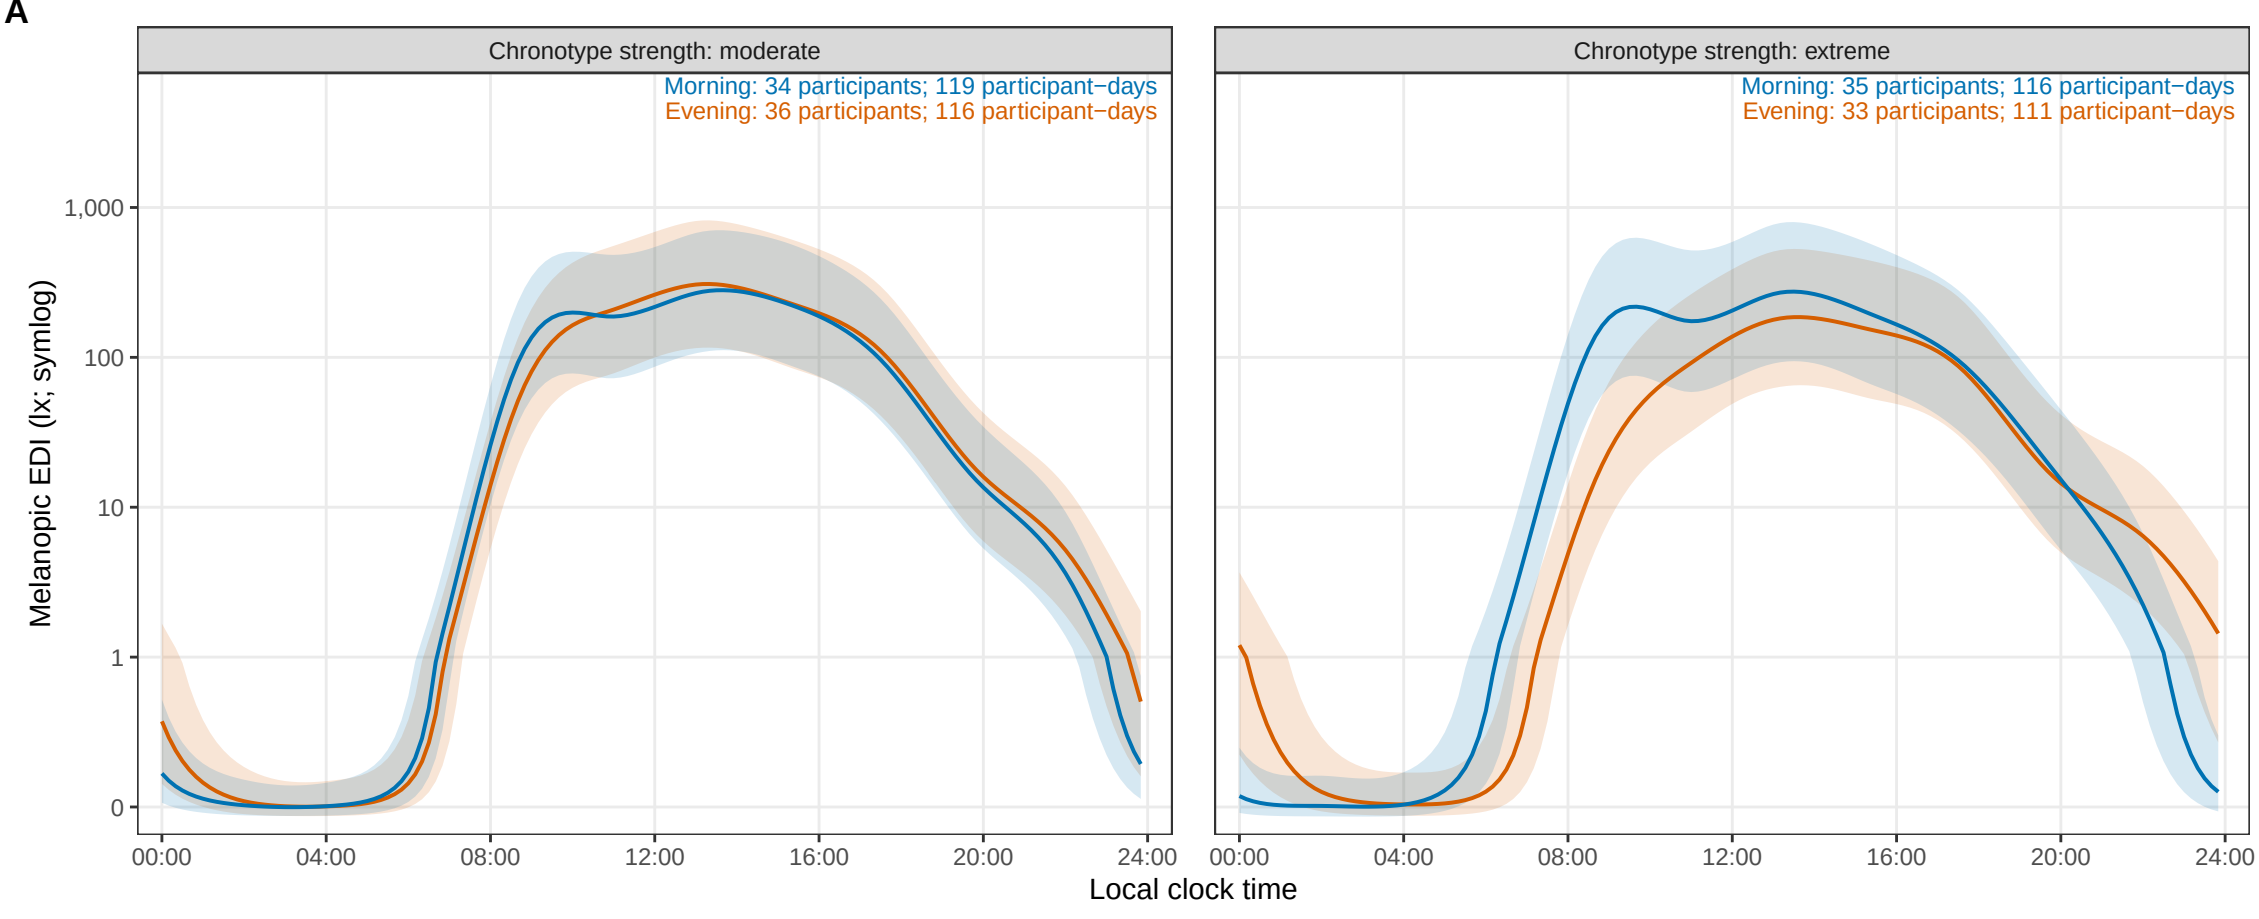
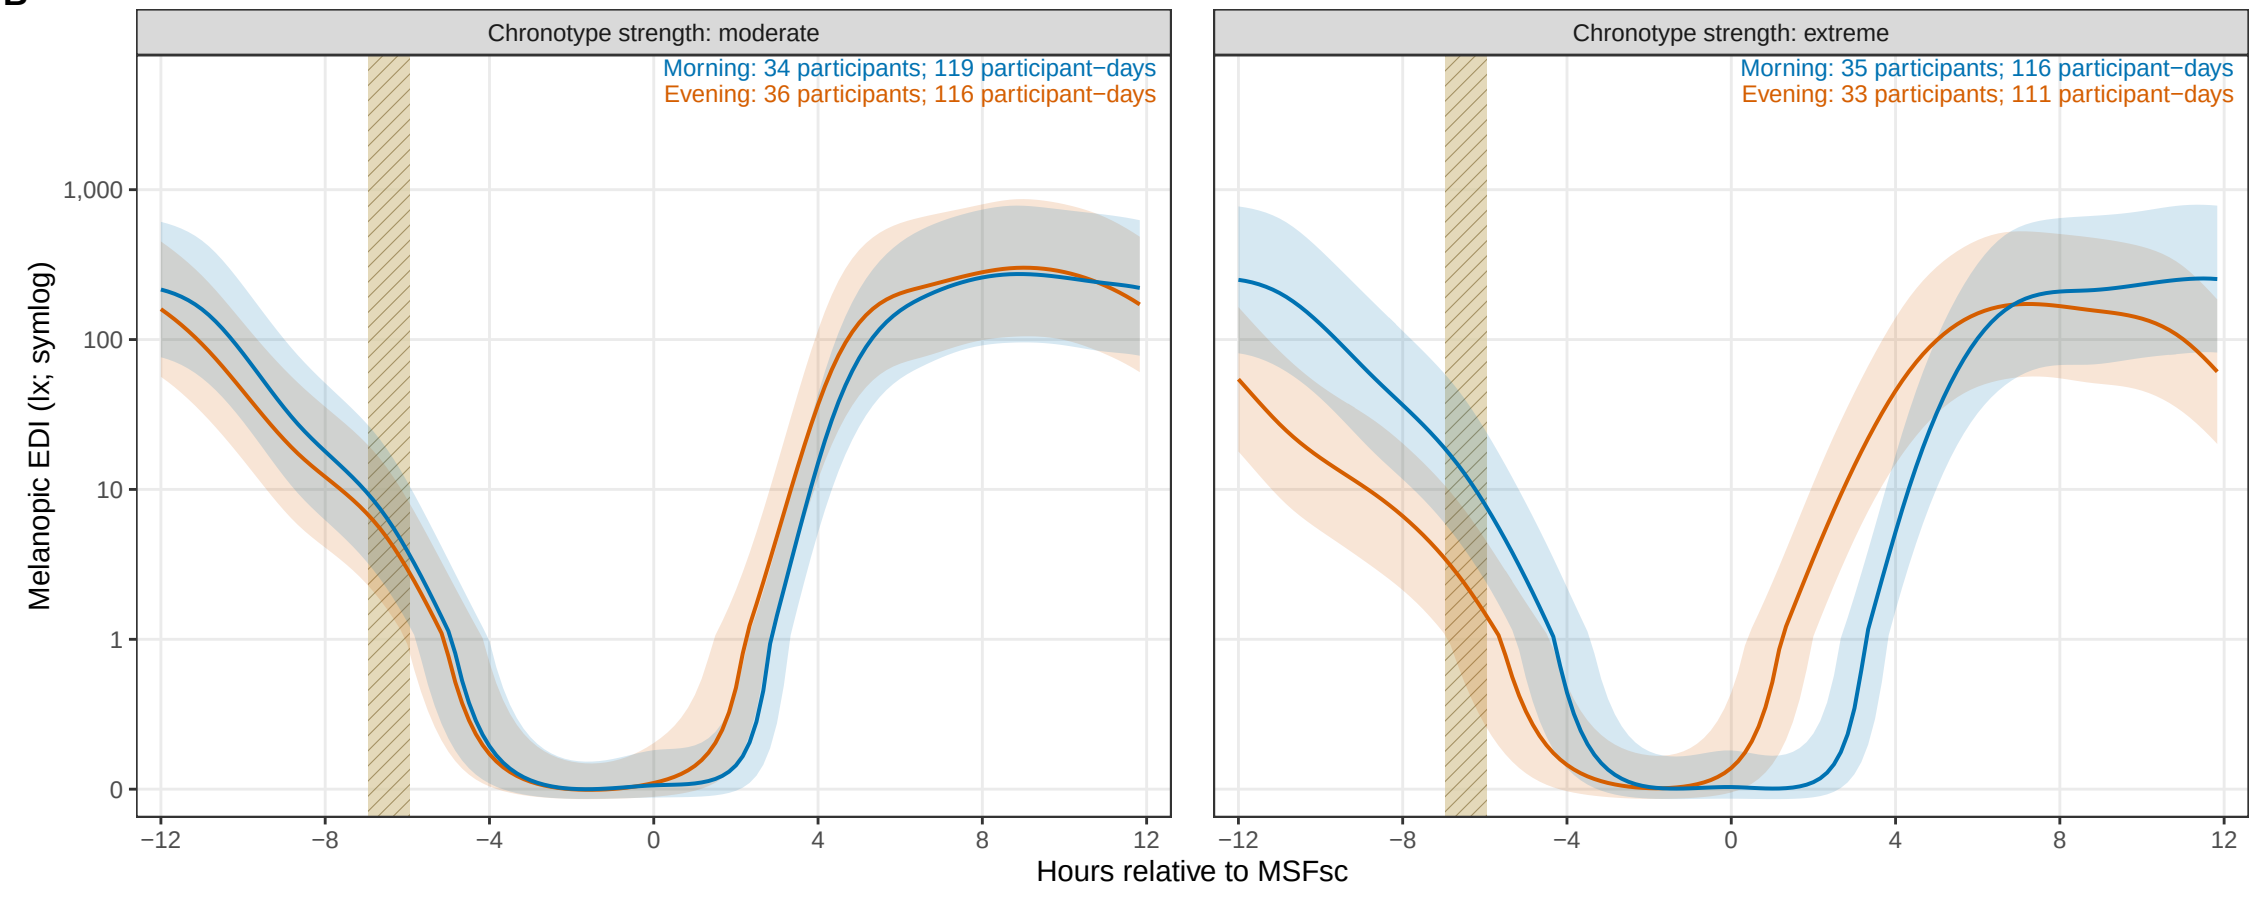
Near−eye Work daily exposure patterns

Common photoperiod distribution; site, participant and day effects excluded

A



B



A: local clock time. B: circadian phase. Chronotype direction: morning (blue) and evening (orange).
Back−transformed log−scale means and 95% simultaneous bands across quartiles, day contexts and times within each coordinate.
Symlog: linear below 1 lx, base−10 above 1 lx. Striped band: DLMO reference (Facer−Childs et al., 2019).
Overall uses the same work/free−day mixture for every group.
